The Connected Business Community 4.0
Service Based Software Economy

www.smecluster.com

This one Day event will focus on the growth of "Wearables", the continuous development of "Big Data" and the rise of "Semi-Autonomous Robots" in Industry.

As the third in the series of **SMECluster** events kicked off in 2011, this event will look at what **Industry 4.0** means and what it has to offer to the UK. We showcase the growth of the **Service Based Service Economy** where you can get software for free but pay for use and customisation. Sematronix and Control 2K Limited are looking to bring you the latest news and break-through technologies that are making their way to the Manufacturing Sector and of course other Sectors.
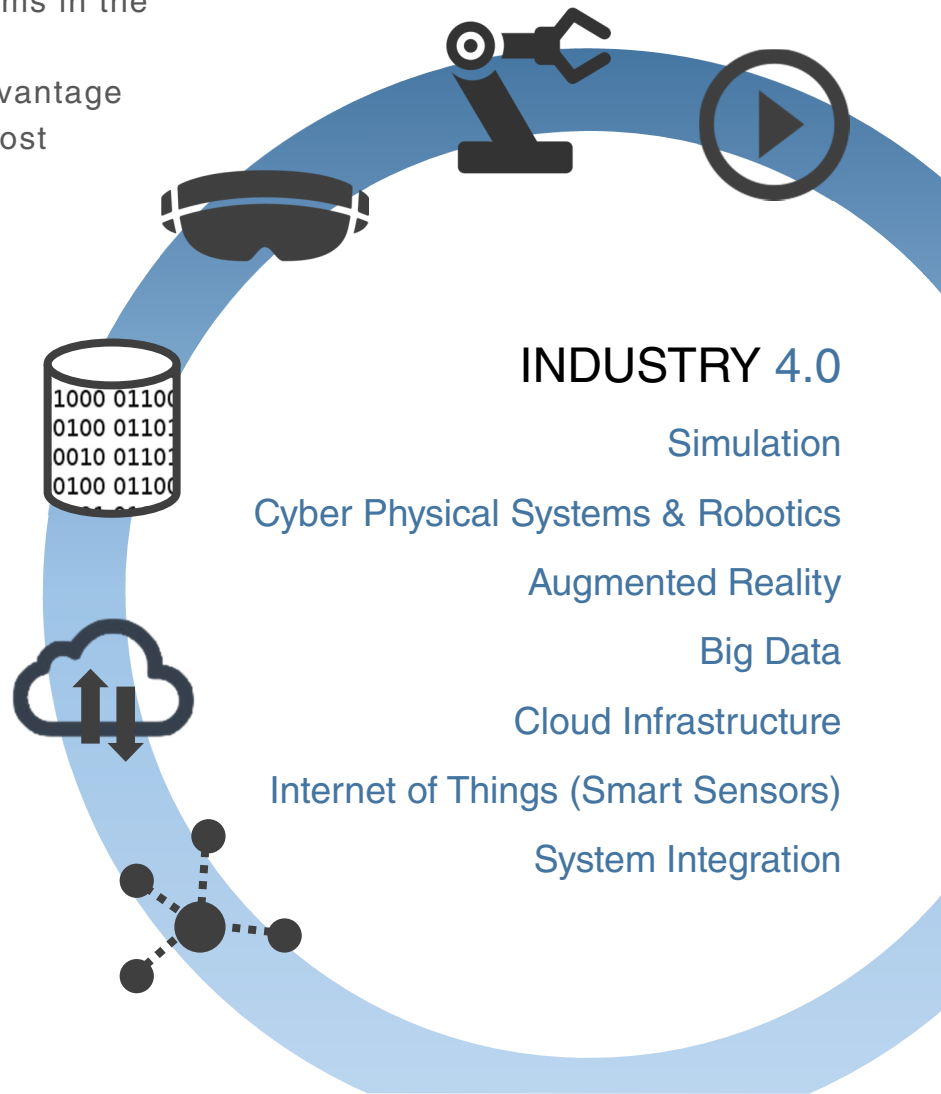

The European Commission continues to develop the SME Marketplace through funding streams in the **New H2020 Calls for 2015/16**.
So find out how you could take advantage of 75-100% funding available to most Businesses. We will have key representation from the Welsh European Funding Office (WEFO) giving you an insight to what's available to Businesses who are interested in expanding their horizons.
