Technical and Professional Network

- Exchange knowledge and information amongst the community
- Develop and extend existing engineering knowledge within Manufacturing
- Network with like-minded individuals to share knowledge and experiences

Technical Community

- Online community >350 members
- Blogs, videos and interviews with Manufacturing professionals
- Regular events

Upcoming events

- Technology Pathway for Implementation
- Bringing Manufacturing Technologies to Life
- Tell us what you want from the network:

TATA STEEL

DIGITAL TRANSFORMATION - The Pragmatic Approach to Industry 4.0 Implementation - “Productivity Boosts and Quick Wins”

Thursday 25th May 2017 – Waterton Technology Centre, Bridgend. CF31 3WT

AGENDA

Stage 1 – Presentations

- 09:00 – 09:10 Introduction and Formalities – Susan Jones
- 09:10 – 09:30 Introduction “Identifying day to day challenges round the current environments” how are we going to move from today’s problems to tomorrow’s solutions –
Paul Davies / Lee Bennett / Neil Wilkins / Kirk Dranfield / Daniel Lilygreen
- 09:30 – 09:45 Taking the Negative situation and turning it Positive – Gash Bhullar
- 09:45 – 10:00 Industweb 4.0 – A Potential Solution for SMEs – Simon Osborne
- 10:00 – 10:15 Utilising Data – Populating your Management System with Quality Data satisfying QS standards – David Phillips
- 10:15 – 10:30 Cyber Attacks and Digital Forensics on Industrial Systems – Daniel Lewis
- 10:30 – 10:40 Astute 2020 Collaboration opportunities
– Dr. Jonathan James / Dr. Cinzia Giannetti
- 10:40 to 11:00 Tea / Coffee Break

HEADING TOWARDS THE 4th REVOLUTION

Focus Area for Manufacturing

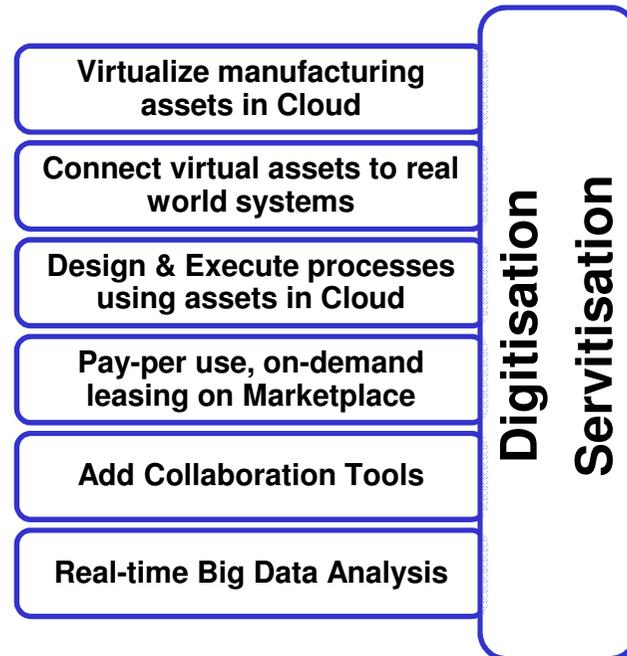

Living on the Edge of the Cloud

Middleware

Cloud Based Rapid Elastic Manufacturing Industry 4.0 - Everything as a Service

Living on the Edge of the Cloud

FOG Computing links to
Manufacturing Systems

Middleware

CREMA – Developing a system in the context of Industry 4.0, which enables manufacturing processes to establish, manage and automate work processes in a cloud environment.

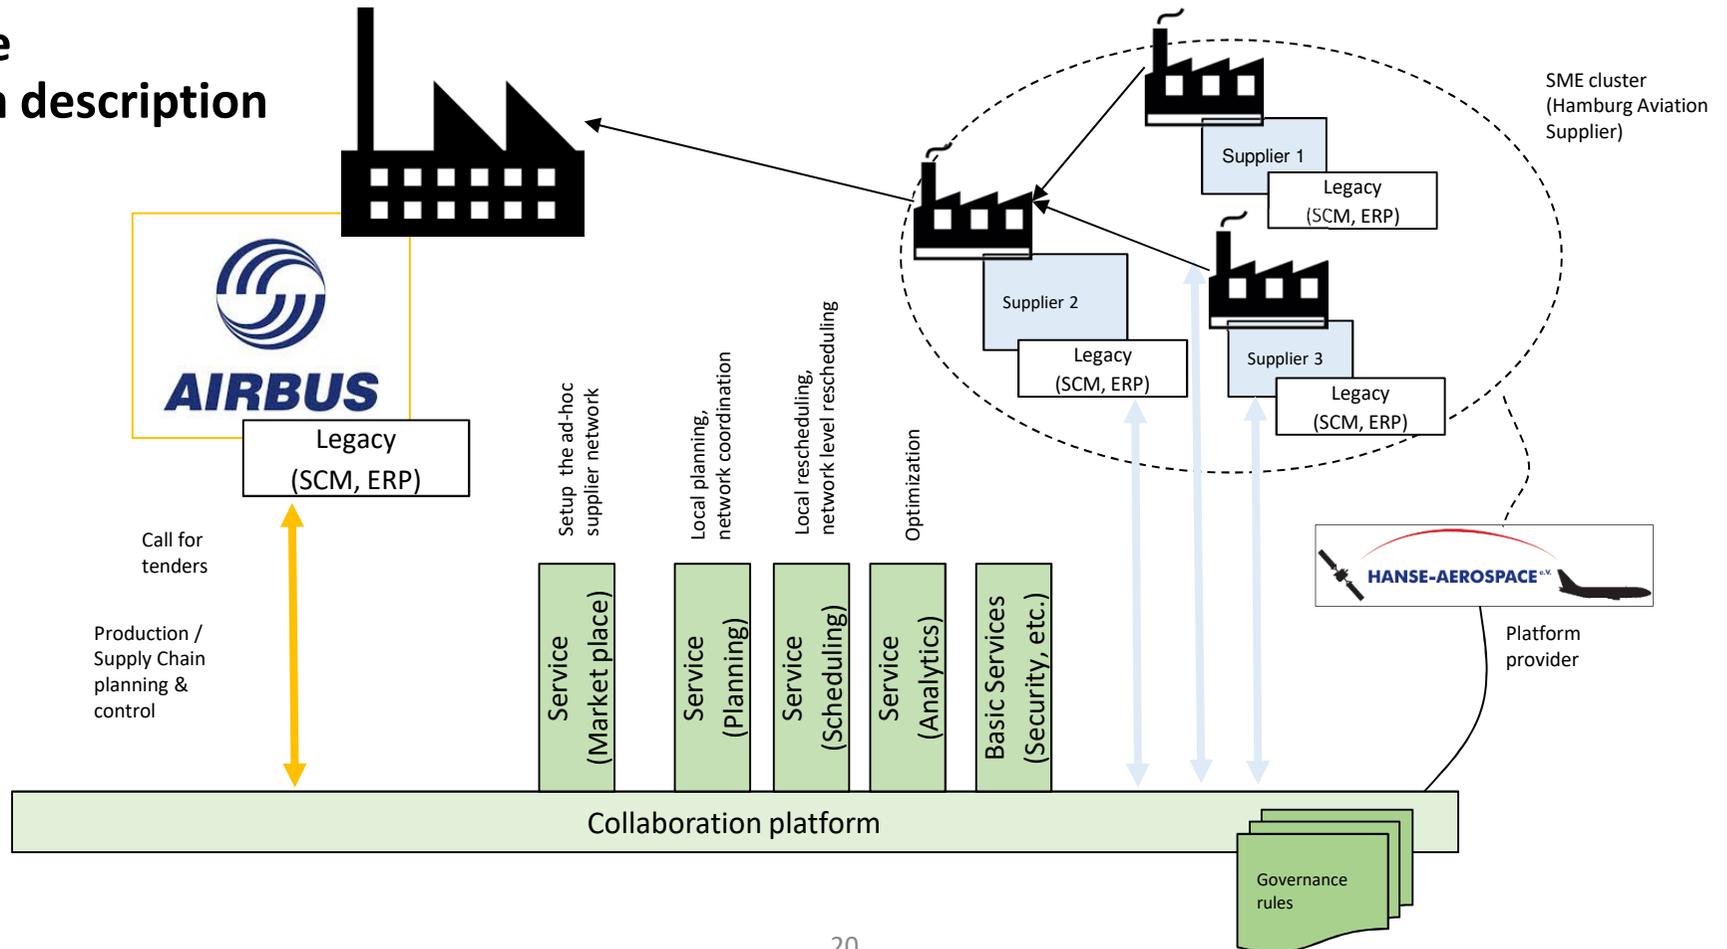

Aims in making processes more elastic and more flexible by using the XaaS and Cloud model.

PROJECT PORTAL

PROJECT PORTAL

SMECluster is a commercial platform
Owned by Sematronix and supported by Control 2K
which can offer a range of services built on
successive EU Projects

Welsh Cluster – 4IR

- Looking for new business
- Opportunities to learn best practice
- Reduce overheads and share resource
- Need to connect to value chain
- Governance Models for working in the new economy
- Collaboration across sectors
- Learn about new technology such as wearables

Home About Us Members Benefits Resources Search Q

How does SMECluster help?

SMECluster helps you identify new opportunities and win business with the peace of mind that you will always be advised of a tender opportunity.

You will see from the level of detail we go to in our Category System that your profile can be as broad or refined as you want. And it's flexible - if you want to get tenders from a new sector or simply just tweak your profile, it's as quick and simple as ABC.

At this point, you can also choose whether or not to include 'Contract Award Notices' - these tell you who won the contract and its value.

SMECluster offers consultancy services and technical support for PQQ and Tender writing for the successful submission of bids. With Bid Management, e-Procurement and Profile Matching tools to save search time and the provision of a "Step by Step" guide to completing paperwork you can be confident in your bid submission.

Join our SMECluster platform and identify new opportunities and win business

WELCOME TO THE AUTOMOTIVE CLUSTER IN WALES

Welcome to the Welsh Automotive Forum (WAF). An independent company, incorporated in 2001, to develop a common approach in achieving sustainable continuous improvement for the Automotive Industry in Wales. An industry led organisation, supported by its Members, Industry Wales and the Welsh Government. The Board of Directors comprises senior executives from the industry and is chaired by Professor Garel Rhys CBE. Tim Williams is the Chief Executive.

The role of the Welsh Automotive Forum continues to deepen and widen. This places it firmly at the

Cyber Security and DevOps Now

20th June Cyber Security Now 20th June DevOps Now

Member of the Month - RF-Idirect

RF-Idirect are UK leading experts of Radio Frequency Identification (RFID) software and hardware, based in Macclesfield, Cheshire.

Clearing up what is or is not I4.0 / 4IR

What it is:

- The Virtualisation of Assets
- The Twinning of Real life processes
- Disruptive
- Challenging and requiring a vast array of skills

What it is not:

- The complete IT solution to plant problems
- The replacement of good engineering skills and technics
- A simple plug and play solution – Although the marketing world would tell you otherwise.

Taking the Negative situation and turning it Positive

The Negative Side to I4.0:

- Difficult to know where to start deployment
- No real cost of final deployment
- Who fixes it when it goes wrong
- Where do all these skills come from

The Positive:

- Clear deployment of I4.0 would completely transform the business
- New markets open up
- Brexit will bring the focus of manufacturing back to the UK

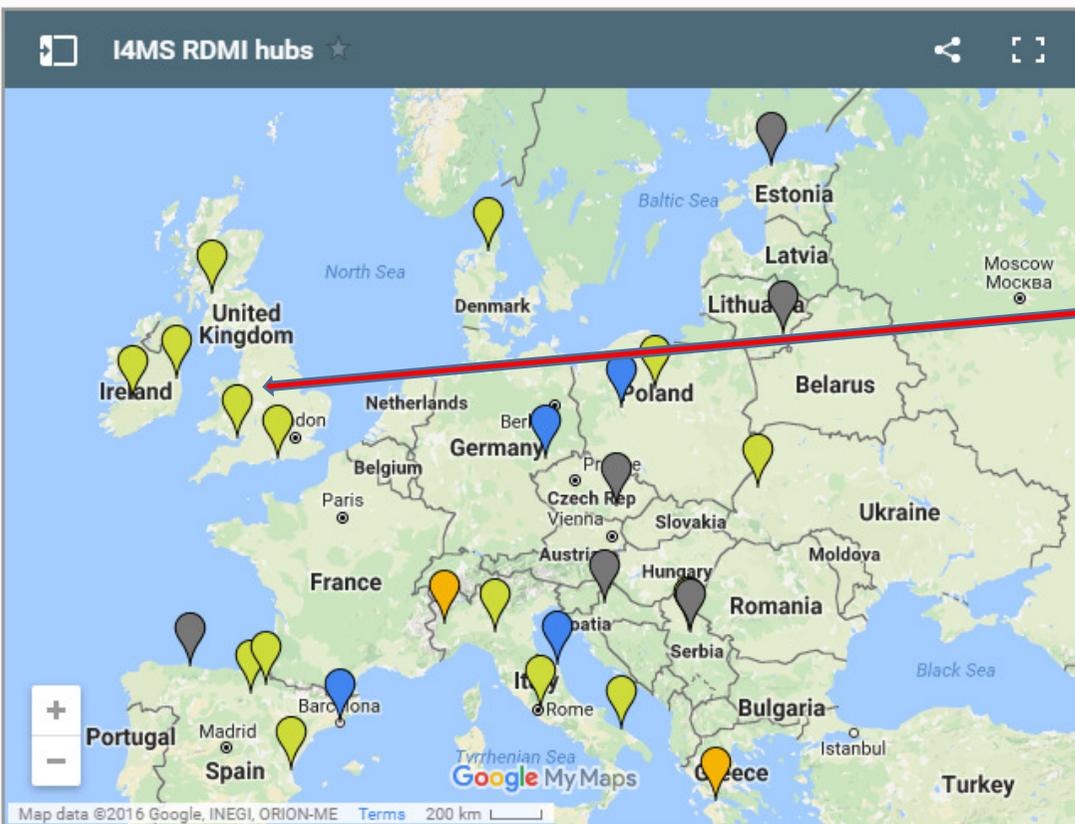

REGIONAL HUBS

Home / Regional hubs

Open call process Digital Innovation Hubs successfully completed

In the two phases of the open call process, a total number of 41 consortia submitted proposals to prepare feasibility studies to establish Digital Innovation Hubs (DIH) in their regions. The evaluation process resulted in the selection of 29 proposals which will receive financial support as well as mentoring and coaching services. Contracts will be established between relevant I4MS projects and the DIH consortia. The mentoring and coaching will start at a summer school which will also serve as the kickoff meeting and which is to be held in September.

For more information please contact the XS2I4MS coordinators Maurits Butter (maurits.butter@tno.nl) and Govert Gijbers (govert.gijbers@tno.nl)

an article on:
- “A Pragmatic Approach
to the Fourth Industrial
Revolution (4IR / I4.0)”

Panel Discussion

1. What advice would you give to a company looking to deploy I4.0?
2. How will we address the increasingly skills base required to embrace I4.0
3. What are the next steps to create a critical mass for Wales to deploy I4.0 and reap the benefits
4. How will Brexit shape the manufacturing future of UK

Paul Havbro – Welsh Government

Paul Davies – Industry Wales

Mark Thomas – Ford Motor Company

Sara Nicholls – Siemens
